

CoroCut® 2

Your versatile go-to
with added power

CoroCut® 2, the number one versatile parting and grooving concept on the market, is expanding with two new geometries.

Are you looking for security in hard-to-chip steels? Our -GL geometry features a fierce chip breaker providing unmatched chip control. Searching for parting-off productivity? Our -CR geometry delivers high-feed performance across a wide range of materials.

Application -GL

- Parting and grooving in long chipping materials using low to medium feed
- Suitable for ISO P components with low carbon content
- Works for both parting off and external grooving

Application -CR

- Offers productive parting off
- Can be used in a large variety of workpiece materials, mainly ISO P and ISO M
- First-choice geometry when a strong edge line is needed, for example for interrupted cuts

Features and benefits

- Our FlashLight technology provides higher quality and a more consistent edge line, resulting in superior and predictable tool life
- Our rail interface ensures stable clamping and high-performing grades, enabling increased productivity, higher output and reduced costs
- -GL features the most aggressive chip breaker in the CoroCut® 2 concept, providing superior chip control in demanding materials
- -CR features a strong edge suitable for higher feeds or intermittence, increasing parting-off productivity
- Updated with a wiper design, -CR generates excellent surfaces resulting in improved component quality

Service offer

Tailor Made®

Our Tailor Made® offer allows for automated design of unique tool solutions with quick quotations, easy ordering and competitive delivery times.

Yellow coat support

Our wide network of machining experts provides comprehensive support, from choice of tool and machine to programming and other strategic or technical considerations.

CoroPlus® Tool Guide

Discover the digital yellow coat experience with our CoroPlus® Tool Guide platform to aid your application needs.
